

TAWCHIFUL ISLAM

Full Stack Developer

tawchif04@gmail.com · +8801616241205 · Chittagong, Bangladesh · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

CAREER OBJECTIVE

Full Stack Developer with practical experience building and deploying end-to-end web applications using React.js, Next.js, Node.js, and MongoDB. Seeking an international, product-based role where I can deliver scalable solutions and grow alongside a high-performing, globally distributed team.

TECHNICAL SKILLS

Frontend: React.js · Next.js · JavaScript (ES6+) · Tailwind CSS · Framer Motion · HTML5 · CSS3

Backend: Node.js · Express.js · MongoDB · REST API · JWT Authentication · Better Auth

Tools: Git · GitHub · VS Code · Postman · Vercel · Netlify · MongoDB Atlas

PROJECTS

Healync - Doctor Appointment Platform

[Live Demo](#) · [Client](#) · [Server](#)

Developed a full-stack doctor appointment booking platform that streamlines specialist discovery and consultation scheduling, replacing manual hospital visits with a digital-first patient experience.

Key Features:

- Users can browse verified specialists across multiple medical fields and book appointments directly through the platform.
- Patients can request a trained Medical Companion to accompany them during hospital visits, tests, and prescriptions.
- Delivers curated daily health tips covering nutrition, vision care, bone health, and lifestyle habits.

Target Users: Patients seeking convenient specialist access, elderly individuals needing hospital support, and health-conscious users looking for preventive care guidance.

Tech Stack: Next.js · JavaScript · Node.js · Express.js · MongoDB · Mongoose · Better Auth · Vercel

Bookworm - Full Stack Digital Library

[Live Demo](#) · [Client](#)

Developed a digital library platform that transforms the traditional book discovery experience, enabling readers to explore, filter, and borrow books online without visiting a physical library.

Key Features:

- Users can browse books by category and filter specifically for short reads under 200 pages, catering to busy readers.
- Diverse collection spanning Story, Tech, and Science genres, catering to readers of all ages and interests.
- Features a daily motivational short story to keep readers engaged and build a consistent reading habit.

Target Users: Book enthusiasts, students, and busy professionals who prefer a fast, categorized, and accessible online reading experience.

Tech Stack: Next.js · React · MongoDB · Better Auth · Tailwind CSS · DaisyUI

Keen Keeper - Relationship Manager App

[Live Demo](#) · [Client](#)

Developed a relationship management app that helps users stay consistently connected with the people who matter most, turning communication habits into measurable, visual insights.

Key Features:

- Users can set reminders to reach out before important moments, ensuring meaningful relationships are nurtured before it is too late.
- Every call, text, and video interaction is logged in a visual timeline, giving users a clear picture of who they have been in touch with and when.
- A dedicated stats page displays interaction patterns through charts, showing how much attention has been given to each relationship.

Target Users: Socially conscious individuals, remote workers, and anyone who values maintaining strong personal relationships through consistent, intentional communication.

Tech Stack: React.js · Vite · React Router DOM · Recharts · Tailwind CSS · DaisyUI · Netlify
